	· Sir Ispace Newton was a mathmatician.
	. The 3 knus explain the relation between force,
	matter, & motion.
	An object moving at constant velocity will
1	continue to until acted upon an unbalanced
00	force.
10	Example- a soccer ball that is at vest will
	accerterate until kicked (un balanced force)
	· Friction is the force that 2 surfaces exert
	on each other when they rub against each
	other got to mas and go got of the rungs
	· Air vesistance is the friction experienced
	by an object moving through the air.
1 / 3	Force was acted upon card, not cenny: it didn't mor
